DETAILED ACTION

Claim Objections

1. Claim 2 is objected to because of the following informalities: The claim does not label the first step as "(a)" and starts with "(b)". "(a)" should be placed on line 2 after word 3, "of". Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Gennaro US 6,317,834.

Application/Control Number: 09/963,867

Art Unit: 2134

As per claims 1-3 Gennaro teaches a biometric access verification system, (Col 4 lines 54-56). Gennaro teaches obtaining and storing a biometric profile for a user to be authorized, (Col 5 lines 9-16). Gennaro teaches a biometric acquisition device for a user to submit a biometric sample, (Col 6 lines 14-20). Gennaro teaches obtaining a current biometric sample from an individual attempting to gain access, (Col 7 lines 38-41). Gennaro teaches comparing the current biometric sample to a previously stored biometric sample and allowing access if the user is authorized (Col 7 lines 42-50).

As per claim 4 Gennaro teaches denying access if the user is not authorized, (Col 8 lines 37-43).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gennaro US 6,317,834 in view of Canestaro US 6,748,540

As per claim 5, Gennaro teaches biometric acquisition and storage, (Col 4 lines 45-56). Gennaro does not disclose reporting unauthorized access attempts.

Application/Control Number: 09/963,867

Art Unit: 2134

Canestaro teaches reporting a failed access attempts to an administrator for security reasons, (Col 2 lines 12-18, Col 7 lines 7-10). It would be obvious to one of ordinary skill in the art to add Canestaro's reporting failed access attempts with Gennaro's biometric access system because it would be advantageous to have an improved method for monitoring unauthorized access attempts to a computer system for administrators, (Col 2 lines 1-10 Canestaro).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher J Brown whose telephone number is (571)272-3833. The examiner can normally be reached on 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Morse can be reached on (571)272-3838. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
